Full stack web developer with vast array of interests in learning different front end and back end languages, framework, database and best code practices. Curiosity in programming began when I started attending random computer science classes in college campus. My experience in team engagement/training and problem solving can be great assets at a high growth company.

TECHNICAL PROJECTS

DoNation - Github - Front-end | Github - Back-end | Demo
Charity app, which allows users to research numerous charitable organization to award donations.
+ Created a full-stack application React, React-Router, Ruby on Rails, HTML and CSS
+ Stored encrypted user information, utilizing JSON Web Tokens & localStorage to create Signup, Login and Logout features
+ Utilized credit-card feature to let users give donation using their credit-card details
+ Implemented back-end calls to Charity API to provide users with a list of charity organization
+ Constructed a customer service chatbot which let users have a static chat experience

House of Shoes - Github | Demo
Shoe wish-list app, which holds shoes of different bands and category. Users are have the access to search and filter by brand and type; they can add their favorite shoes in their own wish list.
+ Developed a full CRUD application with Ruby on Rails, custom CSS and BootStrap
+ Added a like button which allows the users add favorite shoes to their wish-list
+ Implemented filters and search options to make the application more user friendly

Instagram Lite - Github | Demo
A social media app, allows users to create account, post images, like pictures and add comments on other users account.
+ Developed ruby backend
+ Created authentication for users
+ Implemented a make-like program using rake
+ Utilized different gems to bring graphics and progress bars into the terminal

Home Findr - Github | Demo
Provides customers the opportunity to search for selling homes or apartments and the necessary information required.
+ Developed a web application over the course of three months
+ Used Angularjs for front-end development
+ Used Scrum Agile Methodology to prioritize and manage tasks
